Join the SIU Office of Information Technology for…

CYBERSECURITY DAY

Save the Date: Wednesday, October 10, 2018

IN CONJUNCTION WITH NATIONAL CYBERSECURITY AWARENESS MONTH

Keynote by Frank Myers
Manager Business Value Consultant
US Public Sector

Frank is a force to be reckoned with in the cybersecurity arena. After years with top companies like SPLUNK, Red Hat, Oracle, Osprey Systems, and Novell, Frank has a keen understanding of the magnitude of the security threats we face today. He knows the challenges these and future threats present IT professionals as well as the risks and implications cybersecurity issues have for business.

Frank brings cutting-edge information and strategic insight into the real costs of a cybersecurity breach, and suggests that we are all vulnerable and responsible for the University and ourselves. SIU IT pros, administrators, faculty, staff, and students will all find something extraordinary and actionable in Frank’s presentation.

What is the Real Cost of a Cyber Security Breach?

Technology has advanced to the point where it often outpaces our ability to protect ourselves from our own virtual creations. Cyber intrusion has pushed forward as a top concern for organizations, not to mention an ever-present menace for us as individuals.

What is the real cost of a cybersecurity breach? Think about that question. There is a cost in actual dollars, lost reputation, damage to systems and records, diminished trust, legal ramifications, and the ability to do business.

All institutions, all areas, and all people using technology devices are vulnerable to cybercrime…and equally responsible for preventing it. Know the real costs!

Security Day Agenda

8:30 a.m.  Meet and Greet
9:00 a.m.  SIU Takes Cyber Security Seriously
10:00 a.m. Break/Late Entry
10:30 a.m. Keynote: Frank Myer, SPLUNK
12:00 p.m. Lunch on your own

1:15 p.m.  CIO Roundtable with Frank Myer and SPLUNK

Look for additional cybersecurity workshops throughout the month of October.
