Brad and Bob, both Senior Engineers with Proofpoint, will talk about the latest cyber-schemes as revealed through Proofpoint’s analytics, research, and experience. They will share a wide arrays of facts and trends as detailed in Proofpoint’s The Human Factor 2018: People-Centered Threats Define the Landscape. They will then explain how we can combat today’s attacks across email, cloud applications, and social media channels—and shore up the “human factor” so we are all less vulnerable to opening the door to cyber threats.

Security Day Agenda—Guyon Auditorium, Morris Library

- **8:30 a.m.** Light Breakfast and Meet and Greet
