The Office of Information Technology (OIT) is looking for several student employees to work in our various departments. Although previous technology experience is a big plus, we are looking for students who are smart, diligent, willing to learn what we do, and grow with us during their time at SIU.

What you must be able to do (the basics):

- Show up on time and when expected.
- Treat people with courtesy and respect.
- Engage with those around you (other employees and our campus customers).
- Communicate well.
- Follow up on tasks and pursue answers.

Depending on the department in OIT, your work may include: administrative tasks, device set up and distribution, customer service, technical repair and service, infrastructure maintenance, program development, security monitoring, website enhancement, or public relations and technical writing. If you have the basics (listed above) and are interested in earning cash and professional experience while you are a student, consider working for the OIT.

To be considered, send an email to OIT’s CRC team at crc@siu.edu. Make sure you include a working phone number and email address, and at least a paragraph about why you think you would make a good candidate. (Please address some of the items listed above in your email).

We look forward to hearing from you!
